PROJECTS

Link to my portfolio:

📅 2026 📍 Malaga

Explore my projects and learn more about me at my portfolio:

- <https://mariajose-serrano.github.io/my-portfolio-adalab-maria-jose-serrano-higueras/>

Harry Potter Web App

📅 2026 📍 Malaga

A React application that displays a list of Harry Potter characters and allows users to filter them by name and house. It also includes a detailed view using React Router.

- <https://github.com/Adalab/Harry-Potter-Web-App>.

Twitter Lab Web App

📅 2025 📍 Malaga

A web application built with pure HTML, CSS and JavaScript that displays user cards, allows users to mark profiles as friends, and saves the current state in the browser using local Storage.

- <https://beta.adalab.es/modulo-2-evaluacion-final-bis-mariajose-serrano/>

Online Shop Web App

📅 2026 📍 Malaga

A REST API for an online store built with Node.js, Express, and MySQL. Manages products with CRUD operations, includes JWT authentication, a frontend to consume the API, and documentation in the README.
